

Air freight Philippines to Europe UK door to door shipping custom clearance service

Advantages of Air Freight

Since the air freight business started it has developed rapidly with its own unique advantages. Compared

with other modes of transportation, air freight has distinct characteristics.

1. **Fast delivery.**The flight speed of airplanes is about 600 kilometers to 800 kilometers per hour, which is much faster than other means of transportation. This feature of air freight meets the needs of some time-sensitive cargo.
2. **Low damage rate and good safety.**After the cargo is loaded on the plane, it is difficult to cause damage to the cargo in the air. Therefore, the damage rate of the cargo is low and the safety is good in the entire cargo transportation link.
3. **Large space span.**In a limited time, the space span of the aircraft is the largest.
4. **Air freight can save related costs for production companies.**Due to the speed of air transportation, it can speed up the circulation of production enterprises' commodities, thereby saving product storage fees, insurance premiums and interest expenses, etc.

1*20GP FOB Tianjin to Brooklyn, NY 11224 DDU service

I was very happy with the service. Daisy was my sales representative and even though it was my first time buying and I asked a million questions, she always answered all of them. The service was great. I did have some misunderstanding with the product, but the mistake was fixed and there is no hard fillings left on my site.
